Salt River Siphon Wins Build Arizona Award

Achen-Gardner Construction is honored to have won a Build Arizona Award from the Arizona Chapter Associated General Contractors of America for our **Salt River Siphon Repair Design-Build** project for Central Arizona Project (CAP). Members of the project team accepted the award at the Annual Dinner and Build Arizona Awards Banquet on Friday, January 24th.

This project included the dewatering, assessment, and repair of the Salt River Siphon, one of the largest segmented steel pipelines in Arizona. The siphon spans 8,900 LF underneath the Salt River near Granite Reef Dam and is constructed of 21-foot diameter steel pipe that is buried more than 50 feet below the river bottom. Work during this project was conducted 24/7 and provided the most detailed assessment and coating repairs ever performed on a CAP steel siphon. UV CIPP Rehabilitation in Glendale

We recently rehabilitated more than 1,100 LF of 8" sewer line with UV CIPP liner as part of our **Underground Infrastructure JOC** for the City of Glendale. [Visit our website for more project details and photos.](#) We are always looking for opportunities to build relationships with new clients. Contact us to discuss how we can utilize one of our existing JOC contracts to provide services that exceed your expectations.

Common Ground Award

Our **Twin Peaks-Blue Bonnet Road Gravity Sewer Design-Build** project has won a Common Ground Award from the Metropolitan Pima Alliance (MPA). MPA's Common Ground Awards recognize community leaders, projects, and events with successful collaboration for the overall benefit of the community. The Pima County Regional Wastewater Reclamation Department and its design-build team of Achen-Gardner Construction and Engineering & Environmental Consultants collaborated with area stakeholders, including the Town of Marana and the Arizona State Land Department, to design and construct this important component of local sewer infrastructure. Center for JOC Excellence National Conference

Achen-Gardner Construction attended and was an exhibitor at the **Center for Job Order Contracting Excellence (CJE) National Conference** in January. As the designated non-profit association for Job Order Contracting and related contracting methods, CJE provides best practices, education, JOC certification, credentialing, resources, and networking for the collaborative project delivery methods. Achen-Gardner has completed or are currently working on 40 JOCs for 16 different agencies throughout Arizona and we enjoyed having the opportunity to connect with other JOC professionals nationwide.

Emergency Response: Tempe Water Line

We recently assisted the City of Tempe in cleaning up and repairing a break in a 12" water line at the intersection of Rural Road and Elliot Road. Repairs included the replacement of 5 LF of 12" DIP water line, a 24'x60' asphalt patch, and restoration of 30 LF of sidewalk, curb, and gutter. We are proud to provide emergency repair services to the City of Tempe as part of our **Underground Utility Construction JOC** project. We have several JOC contracts to perform emergency services and our extensive local resources allow us to have emergency repair crews onsite quickly and complete repairs efficiently. Contact us for more information on utilizing one of our existing emergency repair JOC contracts.
