Large Diameter Sewer Installation

Achen-Gardner Construction is working on the **59th Avenue Sewer South of Baseline Road CMAR** project for the City of Phoenix. We are removing the existing 15" sewer and replacing it with a new 30" sewer in the same alignment. The scope includes 4,600 LF of new sewer and the installation of 15 precast manholes (7' and 5'). The project requires excavation depths up to 27 feet. [Visit our website for more project information and photos.](#)

National and State APWA Award Winners

Two of Achen-Gardner's projects have won awards from the American Public Works Association (APWA).

Our **Salt River Siphon Repair Design-Build** project for Central Arizona Project (CAP) has been awarded the 2020 Public Works Project of the Year award in the category of Environment, \$5M But Less Than \$25M from APWA (National) and the Arizona Chapter APWA. This project included the most detailed assessment and coating repairs ever performed on a CAP steel siphon. [Visit our website for more project information and photos.](#)

Our **Beardsley WRF Solids Pipeline Rehabilitation** project for the City of Peoria has been awarded the 2020 Public Works Project of the Year award in the category of Environment, Less Than \$5M from the Arizona Chapter APWA. This project involved the installation of the longest section of sliplined fusible PVC pipe ever completed in Arizona. [Visit our website for more project information and photos.](#)

Emergency Response

Achen-Gardner recently assisted the City of Tempe in containing, cleaning up, and repairing a water main break at University Drive east of SR 143. We provided emergency repair services as part of our **Underground Utility Construction JOC** project. We have several JOC contracts to perform emergency services and our extensive local resources allow us to have emergency repair crews onsite quickly and complete repairs efficiently. Contact us for more information on utilizing one of our existing emergency repair JOC contracts.

Remote Sewer Rehab

We recently completed the rehabilitation of 367 LF of 6" sewer line in Pima County utilizing ultraviolet light cured-in-place pipe as part of our **Wastewater Conveyance JOC** project. The pipe had been installed more than 60 years ago and had deteriorated due to the remote location and rainwater runoff. Access for our equipment was limited due to the location on homeowner's association land at Skyline Country Club Estates in the foothills of the Santa Catalina Mountains. To minimize impacts to stakeholders and the natural desert landscape we hand-carried our equipment and materials uphill to the job site, rehabilitated the sewer line, and installed a new manhole within a week. [Visit our website for more project information and photos.](#)

Storm Drain Installation

We are installing more than 6,000 LF of storm drain (15" to 54") on our **Roadway Improvements Related to the Ritz-Carlton CMAR** project for the Town of Paradise Valley. [Visit our website for more project information and photos.](#)

COVID-19 Update

During the COVID-19 crisis, Achen-Gardner remains committed to the safety and well-being of our employee-owners and partners while we work to ensure our projects are completed on schedule. We are adhering to social distancing guidelines and conducting many of our meetings online. We recently participated in our first virtual project interview and have developed procedures to continue this practice in the future when required. We are following updates from the CDC and OSHA and improving our workplace sanitation and safety measures accordingly.
